### Acknowledgements for maps and photographic material

The acknowledgements for colour photographs appear on the relevant colour plates. Permission was granted by the Surveyor-General of Zimbabwe for the map reproductions.

### Personal acknowledgements

A number of people deserve special thanks for their contribution to this encyclopedia. Foremost among them is Helen Mills, who was unstinting in her commitment to ensure that the artwork and design of the book was of the highest standard. I would like also to thank the Principal Authors for their hard work in co-ordinating their various sections - Doreen Sibanda for the Arts, Dai Jones for the Physical Sciences, Misheck Sibanda for the History and Politics section and Dick Pitman for the Natural History section. The contributors deserve special mention in that, for most of them, researching and writing their entries was an after-hours activity which they undertook willingly and diligently. I also wish to thank all those people whose names do not appear in the list of contributors but who offered valuable guidance at the outset as to the areas to be covered and the best people to research and write them, particularly Dr D. H. Phelps.

Kirsty Harrison spent several months putting all the entries onto disc as they came in, while Nigel Harrison provided invaluable support in what has been a major computer Desk Top Publishing venture. My sincere thanks also to the origination team, headed by Hamish McLachlan, to the printers for their patience and co-operation and to Tony Taberer, the Chairman of Tabex, whose offer of sponsorship made the whole venture possible.

**ZOMBEPATA CAVE** This rock art site is on Zombepata Hill on Chilonyora Farm in the Sipolilo District. A 15m-long frieze of paintings covers the entire wall of the shelter. Dominating the frieze is an elephant plastered with a yellowish-white pigment. Porcupine, baboon and dassies (animals which rarely appear in other rock art sites) are also depicted. There are many paintings of sable antelope in a style reminiscent of the mask shown as the central figure at Diana's Vow. This is of particular interest because a nearby shelter has a painting of a man holding a sable antelope mask. There are many complicated designs which may represent beehives, although some of the objects flying out of the open spaces appear to birds or bats. A number of human figures painted in maroon and white may have San characteristics. Excavations undertaken in 1970 disclosed a long sequence of the Stone Age. The Wilton Industrial Complex was sparse because the upper levels of the deposit had been disturbed and washed away by steam action. The Middle Stone Age Tshangula and Bambata Industries were well represented. No artifacts of the Late Stone Age Pomongwe Industry appeared. Of particular interest were two intrusions of a blade industry within the Bambata. Sufficient charcoal was collected for dating and ranged from 40 000 years ago for the Bambata Industry to 1 850 years ago for the Wilton Complex.

**ZVISHAVANE** Altitude: 915m; Rainfall: 569mm; Mean temperatures: hottest month 23°C, coldest month 15°C; Population figure: 26 758; Province: Midlands

This town (formerly Shabani) lies 97km south-west of Masvingo on the main road running from Masvingo to Bulawayo. Other roads lead from the town to Gweru (121km north) and Mberengwa (27km south-west). Zvishavane is also a station on the Maputo-Gweru railway line.

The town developed as a residential centre for the asbestos mine which started operations in 1916, largely in response to the demand for this mineral during the First World War. However, communications and transport facilities were poor until the construction of the rail link in 1928. A Village Management Board was established in 1921; this was succeeded by a Town Management Board in 1930; municipal status was conferred in 1968.

Most of the economic activity in Zvishavane still centres around the asbestos mine. This mine is the largest producer of the mineral in Zimbabwe. In the surrounding area gold, beryl and other precious stones, chrome and iron ore are mined.

Agricultural activity in the Zvishavane area centres on cattle ranching. In the nearby communal lands of Mberengwa and Buchwa peasant agriculture has grown considerably since Independence.

**ZVOBGO, EDDISON JONAS MUDA-DIRWA** (1935- ) Politician. Born near Masvingo, Dr Eddison Zvobgo obtained a BA, an LLB, an MA, an LLM and a PhD through the Universities of Lesotho, London and Harvard. He was a founder member of the National Democratic Party (NDP) and travelled to the USA as an NDP representative. After the NDP was banned, he stayed in the USA as the ZAPU representative. He was recalled after ZAPU was banned, broke with Joshua Nkomo and joined ZANU, of which he became Deputy Secretary General.

In 1964 Zvobgo was arrested for political activism and remained in detention until 1971, after which he was restricted to within a four-mile radius of his home in Harare. He campaigned against the 1971 Smith-Home constitutional proposals and then went to Britain and later to the USA, where he continued his studies but remained actively involved in ZANU activities. He attended the 1976 Geneva Conference as part of Robert Mugabe's delegation. He spent the final phase of the war in Mozambique and attended the 1979 Lancaster House Conference. In the 1980 elections he stood successfully as a ZANU (PF) candidate and was appointed Minister of Local Government and Housing. In 1982 he was appointed Minister of Legal and Parliamentary Affairs and in 1985 became Minister of Justice, Legal and Parliamentary Affairs.
